PDA Teaching Students with Disabilities

This module provides educators with information about the foundations of Exceptional Student Education in Florida, principles of the Individuals with Disabilities Education Act (IDEA) and their influence on educating students with disabilities, and appropriate instructional practices for students with disabilities.

PDA Effective Teaching Practices for Students with Disabilities: Focusing on the Content Areas

This module provides educators with information about appropriate and effective instructional practices for students with disabilities, especially in the core content areas. Application examples are included to support the course content.

These online independent study PDA professional development modules were developed to meet the recertification requirement for teaching students with disabilities credit (Renewal Credit in Teaching Students with Disabilities DPS 2014-12). However, each school district or private school agency determines if the professional development module satisfies the content requirement for their employees. Many of the PDA facilitated online modules may also meet the requirement for recertification credit when approved by the school district. PDA modules are not intended to be a course of study to obtain teacher certification in Exceptional Student Education.
